Time: Mondays from 6:00 p.m. to 8:45 p.m.

Catalogue Description

Current industry analysis and career development. Leadership skills for aviation professionals. Aviation standard procedures. Ethical principles for Aviation. Student projects related to aviation major.

Glynn Falcon’s Description

This is your last chance to achieve something of significance as an undergraduate student in the Aviation Department at San Jose State. Will you be able to put something unique and distinguishing on your diploma which will encapsulate your educational experiences in aviation.

I plan to offer you three such opportunities: The FAA Design Competition for Universities; Collaborating with Max Trescott, Master CFI, to develop the new benchmark for a Private Pilot textbook and/or electronic/digital learning system; and the biggest celebration the Aviation Department has thrown in over 50 years!

You will be the last class to ever graduate from the Coleman Avenue Campus, as the 50 year lease expires in June 2010 and it will not be renewed.

Prerequisite:

You **MUST** be a graduating senior with your major (and minor) form completed and submitted. If you are not a graduating senior, you must drop the class.

Note: The course information, requirements, schedule, and reading assignments, even though accurate at the beginning of the semester, may need altering to accommodate circumstances that may arise during the course of the term.

Aviation Seminar At-a-glance

Course Materials & Textbook: None

Weights of Assignments and Grading Scale

The final grade for the course will be allocated as follows:

| | |
|---|-------------|
